

**15-10-10**

**GUARANTEED ANALYSIS**

Total Nitrogen (N)	15.00%
7.50% Ammoniacal Nitrogen	
7.50% Urea Nitrogen	
Available Phosphate (P2O5)	10.00%
Soluble Potash (K2O)	10.00%
Calcium (Ca)	2.00%
Magnesium (Mg)	2.50%
Sulfur (S)	8.50%
Boron (B)	0.08%
Copper (Cu)	0.10%
Iron (Fe)	0.50%
Manganese (Mn)	0.22%
Molybdenum (Mo)	0.0022%
Zinc (Zn)	0.21%

**Derived From:** Urea, Ammonium Sulfate, Mono Ammonium Phosphate, Potassium Chloride, Sulfate of Potash Magnesia, Dolomite, Sodium Borate, Sodium Molybdate, Zinc Oxide, Zinc Sulfate, Manganese Oxide, Manganese Sulfate, Copper Sulfate, Copper Oxide and Ferrous Sulfate.

**APPLICATION DIRECTIONS FOR 15-10-10**

**ROSES:** Portland Rose Society Fertilizer is a high analysis, balanced fertilizer blend that should not be used in quantities exceeding the recommended rates. Make the first application of fertilizer in the spring after the roses have achieved at least four inches of new growth (this will probably be about the middle of April). For hybrid teas, floribundas, grandifloras and other roses of that size, apply a scant 1/2 cup of fertilizer around the drip line of each rose (apply a circle about 10-14 inches from the base of the rose). Work the fertilizer into the soil and then water the plants well. Repeat the applications every 6-8 weeks during the growing season. If desired, applications at half this rate can be made at monthly intervals. For miniature roses the application rate should be about one tablespoon per plant scattered around the bush. For large shrubs and climbers, the application rate may be increased to about 3/4 cup per bush with the fertilizer being applied to an area extending out to about 28 inches from the base of the rose bush.

**OTHER USES:** Portland Rose Society Fertilizer is also a very good general fertilizer and can be used on flowers, vegetables, and shrubs with excellent results. Rate of application should be about 1/2 cup per 10 square feet of planted area twice during the growing season. Water well after any fertilizer application to activate the fertilizer and to prevent potential damage to the plants.

**STORAGE:** Fold over the tops of the bags to keep moisture out as moisture may cause the fertilizer to become lumpy and hard to apply. Freezing temperatures will not hurt this product. As with all garden products, **keep out of the reach of children.**

**CAUTION:** This product contains boron and molybdenum. Use of this product at rates other than those recommended may cause injury to susceptible plants.
